

## **Immunocore to present at the Jefferies London Healthcare Conference**

November 10, 2022

### **Immunocore to present at the Jefferies London Healthcare Conference**

(OXFORDSHIRE, England & CONSHOHOCKEN, Penn. & ROCKVILLE, Md., US, 10 November 2022) Immunocore Holdings Plc (Nasdaq: IMCR), a commercial-stage biotechnology company pioneering the development of a novel class of T cell receptor (TCR) bispecific immunotherapies designed to treat a broad range of diseases, including cancer, infection and autoimmune disease, today announced that management will participate in a fireside chat at the Jefferies London Healthcare Conference.

The presentation is scheduled for Thursday, November 17, 2022, at 9:45 a.m. Greenwich Mean Time (GMT).

The presentation will be webcast live during the conference and will be available in the 'Investors' section of Immunocore's website at [www.immunocore.com](http://www.immunocore.com). A replay of the presentation will be made available for a limited time.

##

### **About Immunocore**

Immunocore is a commercial-stage biotechnology company pioneering the development of a novel class of TCR bispecific immunotherapies called ImmTAX – Immune mobilizing monoclonal TCRs Against X disease – designed to treat a broad range of diseases, including cancer, autoimmune, and infectious disease. Leveraging its proprietary, flexible, off-the-shelf ImmTAX platform, Immunocore is developing a deep pipeline in multiple therapeutic areas, including five clinical stage programs in oncology and infectious disease, advanced pre-clinical programs in autoimmune disease and multiple earlier pre-clinical programs. Immunocore's most advanced oncology TCR therapeutic, KIMMTRAK, has been approved for the treatment of HLA-A\*02:01-positive adult patients with unresectable or metastatic uveal melanoma (mUM) in the United States, European Union, Canada, Australia and the United Kingdom, having demonstrated an overall survival benefit in a randomized Phase 3 clinical trial in mUM, a cancer that has historically proven to be insensitive to other immunotherapies.
